

HVAC SERVICES

Heating, ventilation, and air conditioning (HVAC) maintenance is critical to sustaining good air quality and temperature control in any commercial or residential space. Along with our facility and grounds maintenance, Ambassador Services also has the expertise to maintain your HVAC system, helping ensure systems are cooling and heating efficiently, and that everyone in your space is breathing clean air.

INSTALLATION, MAINTENANCE, AND REPAIR

We offer full-service HVAC solutions, including installation, maintenance, and repair. Whether you're building from the ground up, replacing an old system, or need inspection and repair, Ambassador Services has the trained professionals to do it.

Over time, HVAC systems can lose efficiency, working harder to heat, cool, and filter the air in your building. This strain can cause systems to break down, leading not only to costly repairs, but also to lost revenue for businesses that rely on constant air conditioning to meet industry standards. Mold also grows easily in HVAC systems, and can release toxins into the air you breathe. Our air-duct cleaning and filter replacement services help ensure your indoor air quality is OSHA-compliant and that no one in your facility is breathing in those toxins.

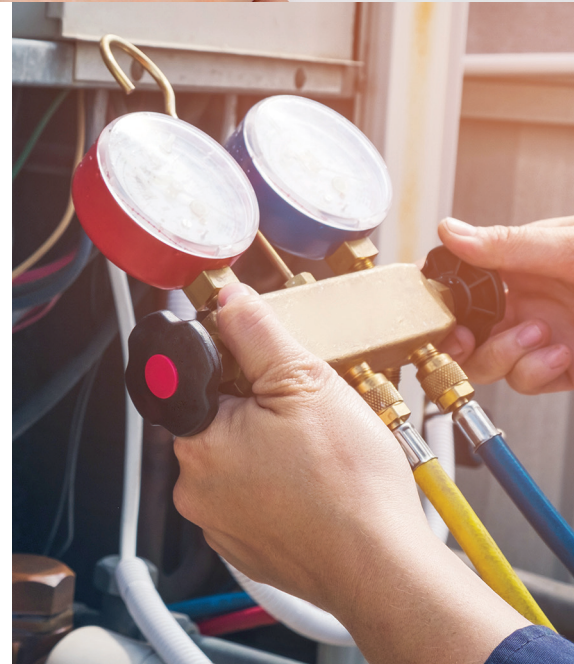

CUSTOM PLANS AND PREVENTIVE MAINTENANCE

Our comprehensive HVAC program is custom-tailored to your specific needs. Every maintenance plan begins with a consultation, where Ambassador Services assesses your building management system's age, hours of use, and your building's occupancy, along with any issues you may be having with efficient heating and cooling.

From there, we can create a plan that fits your needs and your budget, solving any immediate problems and establishing a preventive maintenance plan. A well-maintained HVAC system works more efficiently, lasts longer, and keeps your energy bills down. Having a plan in place also means getting ahead of peak-season problems, such as a long wait to repair or replace air conditioning systems in the heat of the summer.

QUESTIONS? GIVE US A CALL.

We want you to breathe easy, stay comfortable, and be confident that your system is in top condition under our care. Ambassador Services is available 24/7 to answer any questions you may have about our HVAC services, grounds and landscaping, or general facility maintenance. You can speak directly to a representative today at **(281) 727-0117**, email us at **sales@ambassadorusa.com** or visit us online at **www.ambassadorusa.com**.
